### A masterful explanation of the cell biology that students need to know!

Includes bonus online faculty resources!

### Cell Biology, 2nd Edition

Pollard, Earnshaw with Lippincott-Schwartz and illustrations by Johnson

The 2nd Edition of this critically acclaimed text will enable your students to...

- visualize molecular structures and functions through nearly 500 full-color illustrations.
- understand how molecular changes lead to the development of diseases through numerous Clinical Examples throughout.
- explore the full text online • perform searches • download images • watch animations • and more!

2007. 928 pp. 495 full-color ills.  
ISBN: 978-1-4160-2255-8.
